

SIGNAL RANGER

Interactive Voice Communication Unit

Our free standing pole offers economical wireless emergency call box functions using dependable UHF 2 way frequencies. Push button activation contacts your security, identifies pole location and initiates a 2 way conversation.

This high visibility pole features a flashing blue light when activated and easily identifiable decals throughout a 360° area.

These basic features make the **SIGNAL RANGER** an ideal and economical choice for college and business campus areas, retirement communities and public parks.
